Education

National Institute of Technology Calicut

Master of Technology (Computer Science and Engineering - Information Security) - CGPA: 7.48 / 10

Kozhikode, Kerala, India

2024 - 2026

Government College of Engineering

Bachelor of Engineering - CGPA: 8.66 / 10

Bargur, Tamil Nadu, India

2020 - 2024

Devangar Higher Secondary School

- 10th: 89.8 percentage and 12th: 75 percentage

Aruppukottai, Tamil Nadu, India

2014 - 2020

Profile

Enthusiastic software developer with a strong foundation in programming and full stack development. Passionate about building scalable systems, solving real-world problems, and continuously improving technical skills. Eager to contribute to a dynamic organization and grow in a collaborative, innovation-driven environment.

Internships

• Software Developer : SAP Labs, Bengaluru (August 2025 - June 2026)

Developed and maintained backend services for a Retrieval-Augmented Generation (RAG) system used in document grounding applications. Built and optimized multiple RESTful APIs using FastAPI, focusing on scalability, reliability, and performance. Worked on debugging production issues and improving backend efficiency across core workflows. Delivered a major performance optimization by redesigning collection deletion logic, reducing execution time from 300+ seconds to under 2 seconds in production. Improved system responsiveness and reduced backend processing latency significantly.

• Summer Intern : Vortex Engineering Pvt. Ltd., Chennai (April 2023 - May 2023)

During this internship, I have acquired practical knowledge of ATM software architecture and real-time transaction processing, including cash withdrawal workflows, card authentication, secure banking operations, and backend system interactions.

Skills

- **Programming** : Java, C, Python
- **Frontend** : HTML5, CSS3, Tailwind CSS, React.js
- **Backend** : Node.js, Express.js, FastAPI
- **Databases** : MongoDB, SQL
- **DevOps** : Git, Docker, Kubernetes, CI/CD pipeline
- **Cloud & Core** : SAP BTP, OOP, Data Structures
- **AI/ML** : LLMs, Generative AI, RAG, Lang-Chain, Prompt Engineering

Project

1. Resume Building Platform with AI assistance

Developed a web application that allows users to create resumes using predefined templates with integrated AI assistance to enhance profile content and improve wording. Built using React.js, Tailwind CSS, Express.js, and MongoDB, with focus on user experience and dynamic resume generation.

2. TextBook GPT

Built an AI-powered application that answers textbook-related questions and supports academic note-taking. Integrated Google Search with LLM-based retrieval and ChromaDB for contextual and accurate responses. Developed using Python and Gradio UI, focusing on improving knowledge retrieval and learning assistance.

3. Job Search and Recruitment Web Platform

Developed the frontend of a job search and recruitment platform to connect job seekers with recruiters. Built using React.js and Tailwind CSS, focusing on responsive UI design and smooth user experience.

Certifications

- Professional Readiness for Innovation, Employability, and Entrepreneurship (IBM)
- Retrieval Augmented Generation by Krish Naik (Udemy)
- MERN Fullstack Course (E-Learn Infotech)
